

JSE Executive Valuation Dashboard

Equity Valuation | DCF Analysis | Live Market Intelligence

THE PROBLEM

JSE equity analysts spend 2–3 days per company manually extracting data from SENS PDFs, updating Excel DCF models, and rebuilding sensitivity tables each reporting cycle.

- No live market price integration
- Manual WACC sensitivity recalculation
- Separate Excel files per scenario
- No single executive view

THE SOLUTION

A fully automated Power BI platform that ingests audited financials, pulls live JSE prices from Yahoo Finance, and recalculates the entire DCF in real time as assumptions change.

- Live JSE price feed via Yahoo Finance API
- Interactive WACC slider — instant recalculation
- One-click Bull / Base / Bear switching
- 90%+ reduction in turnaround time

KEY VALUATION OUTPUT — FY2025

R147.27 Implied Share Price	R263.36 Live JSE Price	-44.1% Margin of Safety	6.0% Implied Mkt Growth
R256,682m Revenue FY2025	24.5% Return on Equity	5.8% EBIT Margin	OVERVALUED Valuation Signal

TECHNOLOGY STACK

SQL SQL Server Schema & Views	M Power Query ETL Pipeline	DAX DAX Engine 28 Measures	PBI Power BI 7-Page Dashboard	API Yahoo Finance Live JSE Feed
--	---	---	--	--

ADVANCED FEATURES

Live DCF Engine — WACC slider updates R147.27 in real time

Sensitivity Heatmap — 5x5 colour-coded WACC vs Growth matrix

Reverse DCF — calculates implied growth from live market price

Live JSE Feed — Yahoo Finance API pulls R263.36 automatically

Bull/Base/Bear Scenarios — one-click scenario switching

Valuation Signal —
OVERVALUED / FAIRLY VALUED / UNDERVALUED

AFS Brand Theme — Shoprite FY2025 colours from official PDF

DASHBOARD PAGES

- Cover Page — branded entry point
- P&L Overview — Revenue, margins, chart
- Valuation Engine — Live DCF + sliders
- Scenario Analysis — Bull/Base/Bear
- Sensitivity Heatmap — WACC vs Growth
- Balance Sheet — Equity, ROE, leverage
- Executive Summary — All KPIs in one view

DATA SOURCE

- Shoprite Holdings FY2025 AFS (audited)
- Yahoo Finance API — SHP.JO live price
- FY2023, FY2024, FY2025 historical data

SKILLS DEMONSTRATED

SQL & Data Engineering

- Normalised star schema
- Fact + Dimension tables
- SQL views for ETL
- Balance sheet validation

Power Query & DAX

- 4-layer ETL pipeline
- 28 DAX measures
- What-If parameters
- DCF + Reverse DCF logic

Power BI & Finance

- 7-page exec dashboard
- Live API integration
- JSE valuation methods
- AFS brand design

Built from scratch across 7 sessions — blank Power BI file to live JSE analytics platform
